Yeah we are good on trends.

Lucotch says the updated widget for R8 trend graphs is now active. No need to bother Megan

Thanks Janine, I hear you loud and clear and that works for me. I just wanted to know which message and expectation I can pass up the chain and now I know.

Has there been a request for these trend graphs outside of the original 4 monitoring locations?

So everyone is on the same page. We are dealing with 4 different labs the original trend graphs were set up to run off of the analytical data from R8 when we run the combine we will see what we need to normalize on the R6 and R9 data to make this happen for all three regions in a clean and quality manor. I am again asking for some time as we have not QA'd our datasets together to make sure all these fun wiz bang tool work on each region.

I have a mental data gap.....

As an FYI this is the email chain from Matt Loesel to Chris Wagner. These are the samples/locations they are looking for Trends on. I don't see anything on the r8 viewer and I don't have access nor the url for the r6 viewer if that's where it resides. I have taken a look at the scribe project **R08_goldking_combo** and I don't see these locations.

This is the data for which we need the trends analysis as early as possible.

Thank you so much for your help

Chris
